DETAILED ACTION

Claim Objections

1. Claims 3 and 10 are objected to because applicant has included the notation "[sic]" rather than correcting an error.
2. Claim 8 is objected to because of the phrase "in the preceding claim". The parent claim should be specifically referred to by number.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Middelberg (US 2003/0012838). Regarding claim 1, Middelberg ('838) discloses an extruder device with a worm (2) and a worm drive (3), which includes a drive motor (9), which exhibits a rotor (8) which during operation is connected to the extruder worm in such a manner that the rotor and the extruder worm rotate at the same speed (see claim 1 of Middelberg). Instant claim 1 goes on to discuss elements that "can" be used with the claim device during intended operation, but are not required elements of the claimed structure. Claims 2-17 merely further discuss these elements that "can" be used with the claimed device during an intended operation.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
